Motivated professional adept at mastering new technologies to enhance operations. Strong collaborator with excellent communication skills. An expert in software development, driven by a passion for innovative technology solutions.

Work Experience

Software Developer & Product support

[Trust International company](#) | Ramallah - Satah Marhaba

Jan 2023 - Present

As a software developer, I specialize in PHP and Laravel, focusing on building web applications and managing databases. I am skilled in version control and providing help desk support, emphasizing technical troubleshooting, user assistance, and effective problem-solving.

- Developed and maintained multiple web applications using PHP and Laravel, ensuring high performance and responsiveness.
- Designed and implemented database schemas, optimizing queries for performance and scalability.
- Provided help desk support, resolving technical issues, and assisting users with software and hardware problems.
- Conducted training sessions for end-users and created comprehensive documentation for internal and external use.

Back-End Developer Trainee

[Proginer Technologies](#) | Ramallah - Satah Marhaba

Jan 2022 - Dec 2022

As a backend developer, I specialize in Perl and Python, focusing on server-side application development, data processing. I excel in optimizing code, managing databases, and troubleshooting to ensure efficient, scalable, and reliable backend systems.

Developed and maintained backend systems using Perl and Python, ensuring efficient data processing and application performance.

Optimized code for performance and scalability, reducing server load and improving response times.

Managed both SQL and NoSQL databases, handling data storage, retrieval, and migration.

Volunteer Experience

Programming trainer

Ministry of Telecommunication and Information Technology

Dec 2021 - Jan 2022

Teach 7th to 11th-grade students coding techniques using the PictoBlox platform, guiding them from basic to advanced programming concepts. Utilize the tool's visual interface, including building blocks, stages, sprites, and scripts, to enhance understanding and engagement.
